# FOREWORD

This manual has been written to provide basic information for the proper servicing of the Spider models.

The information is grouped in sections. Each section is identified by two-digit numbers. Each section covers the service procedures for the individual groups and sub-groups. They are identified by a number. The root of the number is taken from the general sub-group code now being used for the Parts Catalogue and the Service Time Schedule. This number identifies the service time schedule operation, parts catalogue sheet for the part covered by the service procedure, and the service procedure.

## HOW TO USE THE MANUAL

The information identification number consists of five digits, as follows:

- a) The first two digits identify the section.
- b) The third designates the group within the section and is used in conjunction with the first two.
- c) The last two digits indicate an assembly or task consisting of several parts. This number identifies the sub-group. It refers to the sub-group in both the Parts Catalog and the Service Time Schedule.

Find the information required as follows:

- 1) Find the tab index page for the information on the first page of the manual.
- 2) Find the group and sub-group for the information on the table of contents.

## UPDATING THE MANUAL

- Revision sheets are supplied together with a revised "Composition of the Manual" sheet.
- Revision sheets can be of two types:
  - 1) Replacement sheets: In this case the new sheet will carry the same page number as the old one. A notation in the bind margin will read "Supersedes page . . . dated . . ."
  - 2) Complementary sheets on topics already dealt with: In this case the additional sheet will carry the same sub-group number as the sheet on which the topic has been first dealt with. The page number will be followed by a letter suffix.

Example: If additional information is needed for information on page 2, the new sheet will be 2A.
